

Please keep your bureaucratic hands off XM radio, as a person who makes his living travelling I use their weather and traffic information everyday. The other information they provide is invaluable, and under our system of free enterprise they should be allowed to continue, even grow, to provide more QUALITY radio programming to their paying customers.

Shame on the advertisers (who are really behind this sham) and on the NAB (funded by the advertisers) for trying to stifle what is the only way radio will survive in the next few years. I don't know what I would do without XM as I travel across the country.

Their commercial-free programming is wonderful, the access to CNN and weather and sports and traffic is unparalleled, and they have become a vital part of my day and travels as they have for millions of other Americans.

Rather than go back to regular radio I'd just install a CD player so i don't have to listen to endless, mindless commercials and questionable programming and forced opinions by spokesman paid by the advertisers who fund and fule NAB.
